IMPORTANT TO THE PUBLIC! THE following advertisement was published in May, 1519, in the "Boston Daily Times," and various other newspapers in the United States, by James G. Wilson, Esq., the owner of the "Woodworth Patent," shortly after I had advertised my "PATENT STATIONARY CUTTER, PLANING, TONGUEING, AND GROOVING MACHINE," throughout the United States:

throughout the United Sades:

"I lake this method of answering the frequent inquiries, by letter and otherwise, as to my opinion upon the various notices through the papers, of the Stationary Knife Phaning Machines attempted to be pulmed of upon several persons ignorant of their true worth. I would state for the Information of the enquirers that they will had substantially the machine now offered by several pretending incentors, described in the 10th solume of the Reperfory of Arts, invented by Samuel Beatina, in the year 1791. A file machine was pretended in this country by one Kugler, some six even years sloce, and mother one put up by Albert Richards of West Troy, N. Y, and thandload about the same time. It ought to saisfy the public to know that after this eight years experimenting upon these narchines, not one in use is of any alule for the purposes contemplated.

I sail farmits a Stationary Ende Machine equal to any now in use, or to any offered by the precenting inventory at the cost of the machine and two per cent for my trouble.

JAMES G. WILSO.

May 19, 1949.

I deny that any person ever saw or heard of such a machine as mine until I invented the same. Said machine was operated in the month of August, 1845, and no machine for this could do so much work, and do it as well as mine. In reply to the above aftertisement, and in order that the public may be sourced that I men what I say, I will ob, I to pledge ONE THOUSAND DOLLANS against an equal amount from add Wilson, that ONE of my machines will plane, or plane, tongue and groot with texpower, as much lumber in the same time, and do it as well on trival to be made at my Stemm Mill, Border St., State Hoston, Mass.

The Britchmaint—A nong the few good thurs that the present Congress has acted upon and upon which we sincerely hope they will continue to be set in the plan submitted by Col Sherburne for a floating breakwater or safety nichor 2.5 This scheme has met the entire approbation of the Take cites, and, we limit that Mayor Guriec has long since given his testimonal in its favor. Mr. Sewart presented it memorial from the citizens of Dunkirk to the Senate, and also from ship masters in righting the Western lakes giving it as their dicaded opinion, that the plan would be the means of saving not only life but immense property from destruction. The Mayor of Buhalo and members of the Board of Iride of Oswego concurring in this commendation. Mr. Walker of Wise men, stremously supports the measure and on presenting sundry letters and I move to refer these papers to the Committee on Commerce, and ask that Col Sherburne may have an opportinity of submitting his plan to them at a cardy a day as may suit the convenience of the committee. For my own part it has my respectively and a surgery contident that if his plan should be adopted on the lakes, it would be one of the best things that could be adopted for the security of life and property."

Reported exclusively for the Daily Serdinel BY THE O'RIELLY LINE.

New York, March 23. In the Senate at Washington yesterday after disposing of considerable unimportant business they took up Mr. Clarks non-intervention resolution. Mr. Soule of Louisania took the floor, and opposed the doctrine of non-intervention, and avowed that even Washington and Jefferson looked upon this strringent measure called for by the ne-

Cessity of the time in which they lived.

The difficulties between the U.S. Solicitor at
Astoria, and the Hudson Bay Co., will probably he amicably arranged by the British Minister at

The New York Herald, under date of the 22d, has the following from Washington: A letter written by Gen. Scott last winter, in favor of the compromise measure, is in the hands of his friends and will be published in a few days. Several southern members have expressed them-

selves satisfied with it and strange to say it is equally satisfactory to such Northern Men as Seward and Truman Smith. Baltimore, March 23. The Southern Mail has arrived. New Orleans

papers contain dates from city of Mexico to the 28th ult. The News is of little importance. A decree of banishment has been pronounced against Assain Wall who commanded the Mexican forces during the year 1842. The members of the Miss. Senate on the 9th by a vote 15 to 9 declared it inexpedient and improper for the Legislature to go into the Election of U. Senator for the long term. The house on the same day passed by a vote of 52 to 31 a joint resolution to provide for the election of a senator for the long

Washington, March 24. The papers this morning publish a letter to the department of State from A. D. PLANK ROAD LETTING.

PROFOSALS will be received by the understaned for the graduation, superstructure and bridging of the tilesgow and Huntstille Unit Road.

For the information of monresident contractors, it is proper to state that this road is intended to connect the city of Glasgow, on the Miscouri River, with the town of Huntsville, in Randolph Co., Mo., and is about twenty eight miles in length. The country over which it passes abounds with suitable timber, and is in other respects favorable to the cheap construction of plank road. There are, however, a few streams which will require bridges of considerable extent.

The time for the competion of the road has not yet been fixed, and though it is desirable to complete the road as soon as possible, yet sufficient time will be allowed contractors. Contractors may rely upon promptness in payments, as the means of the company are ample.

Those who wish to examine the route will receive all necessary information from Maj. R. Walker, the Englaser.

Blis will be received until the list of June next, when it is proposed to assign the work to the bidder or bidders whose proposed may be approval as most accordance to the company. Plans of the work will be ready for inspection first of April.

For the encouragement of contracting companies, it is proper to state that there are two other plank road in contemplation in the vicinity, both of which will no doubt be constructed.

Communications are required in duplicate; one copy to be addressed to the undersigned at Huntstille, the other to F. A. Savace. Fed. Secretary of the Company at Gargow. Chaggow, Mo., Feb. 10, 1852.

Another Scientific Wonder)

THE TRUE DIGESTIVE FLUID, GASTRIC JUICE

PREPARED from Reunet, or the fourth Stomach of the Ox, after directions of Baron Llebig, the great Physiological Chemist, by J. S. Houghton, M. D., Philindelphia, Pa.
This is a truly wonderful remedy for Indigestion Despite, Curley after Nature's own method, by Nature's own Agent, the Gastrie Julee.

CF Halt a tenspoontul of Press, indused in water will digest or dissolve, Five Pounds of Roast Beef In about two hours, our of the stomach. itigest or dissolve, live Pounds of Roast Beef in about two hours, out of the stomach.

Perars is the chief clement, or Great Digestive Principle of the Gastrie Julee—the Solvent of the Food, the Purifying, Preserving and Stimulating Agent of the Stomach and Intedines. It is extracted from the Digestive Fully, precised into Ox, thus forming an Artificial Digestive Fully, precised like the natural Gastrie Julee in its Chemical powers, and turnishing a complete and perfect substitute for it. By the did of this preparation the pains and edits of Intigestion and Dyspeptia are removed, just as they would be by a heafthy Stemach. It is done winders for Dyspeptic, curling cases of Debliky, Euncation, Nervous Decline, and Dyspeptic Consumption, supposed to be on the verge of the grave. The Scientific Evidence upon which it is based, is in the highest degree Curlous and Remnakable.

SOLENTIFIC EVIDENCE:

based, is in the highest degree Curious and Remarkable.

SCIENTIFIC EVIDENCE:

Broth Licking in his celebrated work on Aminal Chemistry, says: "An Artificial Digestive Fluid, analogous to the Gastric Jude, may be readily propared from the mocous membrane of the stomach of the Calf, in which various srickes of food, as meet and eggs, will be softened, changed, and digested, just in the same manner as they would be in the human stamach."

Dr. Pereira, in his famous treatise on "Food and Diet, published by Fowher & Wells. New York; page 35 states the same great fact, and describes the method of preparation. There are few higher authorities than Dr. Pereira. Preparation - There are magnitudes and the "Physiology of Digestion," observes that "a diminution of the due quantity of the Gastric Julee is a prominent and all prevailing cause of Dispeysla;" and he states that "a distinguished professor of medicine in London, who was severely afflicted with this complaint, finding everything else to dith, had resource to the Gastrie Julee, obtained from the atomach's of living animals, which proved completely successful.

of them in no wise different from the natural digestice process."

Professor Dunglison, of the Jefferson College, Philadelphia, in his great work on Human Physiology, devotes more than firly pages to an examination of this onliged.—His experiments with Dr. Beanmont, on the Gastric Julee, obtained from the living human storach and from animals, are well known. In all cases, he says, "digestion coursed as perfectly in the artilletal as in the natural digestions."

Dr. John W. Draper, Professor of Chemistry, in his "Text Book of Chemistry," page 286, 8438, "It has brea a question whether artilletal digestion could be performed—but it is now universally admitted that it may be."

Dr. Carpenter's standard work on Physiology, which is in the library of every Physician, and is used as a Text-Book in all the Colleges, is full of evidence similar to the aqove, respecting the remarkable Digestive power of Pepsia and

Milwaukee, Feb. 3, 1262. Milwaukee, Feb. 3, 1992.

The above I found true in every respect, as to the roof of p house, covered with the same tile, invented by Mr AUGUST KRUE.

Brewer, Chestnut-st., 2nd ward.

Brewer, Chestnut-st., 2nd ward.

The undersigned, having carefully examined the pressed roofing Tiles, invinted by Mr. Graesie, have found them perfectly answering the purpose intended. Their practical and suggeoine construction recommend this kind of Tile, not only as a fire proof and perfectly unter-proof coverings but above all for its durability. The ridges and than-mis not only exclude the entering of show or rain-unter, but, by their firm and precise joining of one into the other, they give to the single Tile as well as to the whole covering an ab-outlety movemble position and an intimate connection. Besides this, Mr. Grassale's method of burning the Tilea, deprives them of the injurious tendency to absorb water, making them in this way durable; and joining to the above another virtue, viz. that of depensing with replate. The undersigned therefore consider ourselves fully justified in recommending other building community the above roof-ing The as an excellent and viable material.

SCURF OR DANDRUFF.

Prepared only by S. JOHNSON, 151 E. Water-st.

WOLL THE TO LET.

THE INVIGORATOR is considered infinitely better than

I oil or gresse for the hair, and is an article in which a cleaning and purifying wash is beautifully Liended with a most delicate, silky and glossy moisture for the hair, never before attained, Jot free from animal gresse or essential oils. It clears the pores of the skin, causes a healthy action of the blood vessels, nerves, dee, which free the hair, thereby preventing baldness and gray hair, entirely free the skin from scurf, dandruff, and other cutaneous diseases, disposes the hair to curl, and keeps it so; will positively change the larshest hair into the most son, healthy, glossy state, also imparts to it a darker color, and the free use of it will keep both the skin and hair in a healthy and luxuriant state until the lastest period of his.

Ladles will find the Invigorator a great addition to the folict, both on account of its delicate and agreeable perfune, and the great ficilities it alrois in descript the hair, which, when moist with the huigorator, can be dressed in any required form, so and to preserve it is place, whether plain or in curls. When used on children cheads, it lays the foundation for a good head of hair.

We would respectfully call the attention of our many friends, and the public generally, to an instrument we lave recently imported from Paris, called a "Conformateur," from which the above cut was taken. By it we can take the exact shape, and unaringly fit the most irregular heads. Many can testify to the inmost irregular heads. Many can testify to the inconvenience, and annoyance, and actual prin shey are subjected to, in breaking in Hats that will not fit them. By this ingenious contrivance, this very great annoyance is done away; as the Hats are made to fit perfectly the first time.

Another great advantage is, by keeping a copy of the impression, we can at all times fit our customers from all parts of the country.

We invite all who desire a perfect fit in a Hat, to call and leave an impression of their head; and all those who take pleasure in witnessing the inventions of the ingenious, to call and see the operations of this curious instrument.

Having adopted the Casu System (which all will readily acknowledge to be the best,) we are enabled to sell the best Sik Hat made, at the extreme low price of \$125; surpassing any \$5 Hat enables to set the best Silk list made, at the ex-treme low price of \$1.25; surpassing any \$5 Hat sold in this city. Our Hats are all manufactured by ourselves, and in officing them to our custo-mers, we do so, with the confident assurance, they are all we recommend them to be, we invite all who do not wish to pay two profits upon a Hat, and are willing to save 25 per cent, to call and see us.
